| 3. Requirements List | 4 |

1. Requirement history

| Version | Date | Author | Type | Contents |
|---------|------------|--------|-------------------|---|
| | 2021-11-18 | | Add new recipient | When creating a new recipient and input recipient phone number, even though customer input "0" or not please make our app delete 0 automatically. Because when we put 0 transaction will be failed with Wing and LHPP partner |
| | | | | |

Note: Please make it available for all transactions to Wing and Lyhour.

2. Requirements Purpose

Purpose of this requirement is that in current method, when customer type recipient phone number with 0, transaction will be failed. And refund money to wallet. That's mean our partner API they don't accept recipient phone number with 0.

Example if customer input recipient phone number with 0, (01012341234)like this, System will automatically delete "0" and after deleted 0 phone number will be changed to 1012341234.

The sentence below the phone number please change the word to " Please input recipient phone without 0.

3. Requirements List

The screenshot shows a mobile application interface for a 'Recipient' form. At the top, the status bar shows the time 2:59, LTE signal, and battery level. The form has a title bar with a close button (X) and the word 'Recipient'. The form is divided into several sections: 'Country' with a dropdown showing 'Cambodia', 'Payment Mode' with a dropdown showing 'Cash Payment', 'Bank' with a dropdown showing 'WING CAMBODIA', 'First Name' with a text field containing 'SIN', 'Last Name' with a text field containing 'BOREN', 'Native Country' with a dropdown showing 'CAMBODIA', 'Mobile No.' with a dropdown showing '+855' and a text field containing '010833', and 'Enter City' with a text field. A red arrow points from the 'Mobile No.' dropdown to a text box on the right. Another red arrow points from the 'Mobile No.' text field to another text box on the right. A third red arrow points from the 'Mobile No.' text field to a third text box on the right.
